

GemPro[®]

Wheat Protein Isolate **ULTRA**

Unexpected versatility.

GemPro[®] ULTRA wheat protein isolate is specifically designed for use in beverages, nutrition bars, bakery products, and vegetarian/vegan foods. Its synergy with other proteins makes it ideal for healthy, on-the-go products.

Boost Protein

GemPro Ultra is a lightly hydrolyzed protein containing 90% protein. This high protein content and synergy with egg and dairy proteins makes it great for protein-fortified instant beverage mixes, coffee creamers, and nutritional bars and beverages.

Glutamine Peptides

GemPro Ultra contains around 25-30% glutamine in the form of glutamine peptides. Consumption of glutamine-rich proteins promotes faster recovery after heavy exercise, which makes them popular for applications in sports nutrition bars and beverages.

Mild Flavor

Because of its high protein content and neutral pH, GemPro Ultra has a clean, mild flavor allowing it to be used to add protein to a variety of products.

Water Soluble

GemPro Ultra is an easily dispersible, water soluble hydrolyzed wheat protein, giving it the flexibility to be used in ready-to-drink or powdered beverage products.
